**Subject:** RE: Williams ST012 - Path Forward Dispute Resolution

Enrique and Laura

Looks like we are about to cross the finish line. Some minor changes are attached for clarity and to correct factual errors.

Background on the Air Force revisions ---

Paragraph E: Clarify what was agreed in the Phoenix meeting. We were to move forward with the final work plan for EBR injections (para graph C) that would address the Agencies' comments. The work plan is the starting point for the provisions of paragraphs B, C and D.

Paragraph F: The original wording had been proposed by the Agencies and accepted by the Air Force. Nevertheless, the revision is acceptable with the factual correction in our revision that the ROD says an estimated 20 year timeframe rather than a maximum of 20 years.

Paragraph G: A new addition. It reiterates the rights for dispute already in the Federal Facilities agreement. However, it is acceptable with the clarification that the 20 year timeframe is an estimate in the RODA.

The Air Force revisions are in agreement with the Phoenix meeting so US EPA and ADEQ concurrence with the wording can bring the dispute to a close.

Thank you  
Steve
